

**Wissard Science Reports
2013-14 Field Season**

Prepared by on-ice WISSARD-lite PI (Dr. Slawek Tulaczyk, UCSC, C-521/525)

Field Location: Subglacial Lake Whillans area

Field Personnel:

Slawek Tulaczyk, Matt Siegfried, Carolyn Branecky, Grace Barcheck, Neil Foley, Doug Bloomquist

-- January 3, 2014 --

Grace Barcheck, Doug Bloomquist, and Neil Foley stayed around the WhIP1 camp to download seismic data from 9 units left at this location in January 2013. They also reset the data acquisition rate on these units to 1,000 Hz (from 200 Hz).

Carolyn Branecky, Matt Siegfried, and Slawek Tulaczyk collected data from two GPS stations and removed one to reposition it near the planned drilling location by the camp WhIP1. They also drove to the CReSIS camp to collect additional four drums of snowmobile fuel and dragged them back to the new camp. One skidoo broke a suspension spring and was fixed by CReSIS camp mechanic.
