

**Wissard Science Reports
2013-14 Field Season**

Prepared by on-ice WISSARD-lite PI (Dr. Slawek Tulaczyk, UCSC, C-521/525)

Field Location: Subglacial Lake Whillans area

Field Personnel:

Slawek Tulaczyk, Matt Siegfried, Carolyn Branecky, Grace Barcheck, Neil Foley, Doug Bloomquist

-- January 7, 2014 --

- (i) Carolyn Branecky, Matt Siegfried, and Slawek Tulaczyk traveled to two GPS stations located over the Subglacial Lake Mercer. These stations have not been visited last year because our time in the field in January 2013 was too short. Fortunately, the stations worked fine and collected data over most of this time period. One station was removed from its location and transported back to camp. The entire trip was over 160 kilometers (100 miles) long.
- (ii) Grace Barcheck, Doug Bloomquist, and Neil Foley worked on seismic stations near camp and continued processing and review of data.
